Cleaning and Maintenance

To help maintain optimum performance and prevent overheating of the hairdryer, the rear filter should be cleaned on a regular basis.

- Ensure that the appliance is switched off, unplugged from the power outlet and has cooled down.
- Holding the handle of the appliance firmly, twist the rear filter to remove.
- Using a soft brush, clean any hair and other debris that may build up in the filter.
- Replace the rear filter by pushing back and twisting into position.

Limited Three-Year Warranty

This product is subject to the express warranty card included with the product, as may be amended by reference to and in accordance with the terms of the warranty cards displayed on VS Sassoon website www.vssassoon.com.au

Please retain a copy of your purchase receipt as proof of purchase within the warranty period.

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety instructions should always be followed, including the following:

Polythene bags over product or package may be dangerous. To avoid danger of suffocation, keep this wrapper away from babies and children. This bag is not a toy.

DANGER:

When the unit is used in a bathroom, unplug it after use since the proximity of water presents a hazard even when the unit is switched off.

WARNING: Do not use this appliance in or near bathtubs, showers, basins or other vessels containing water.

- Do not immerse in water or other liquids.
- Do not reach for an appliance that has fallen into water. Unplug immediately.
- Unit is hot when in use. Take care to avoid contact between the hot surfaces of the unit and the skin, paying particular attention to the face, neck and hands.
- This appliance is not intended for use by infirm persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.

IMPORTANT: Always unplug the appliance when not in use or before cleaning. Do not leave unattended when plugged in or switched on. Do not place on any heat-sensitive surface and always allow to cool before storing away.

- Do not use any attachments other than those supplied by Conair Australia Pty Ltd.
- Use this appliance only for its intended use as described within this instruction booklet.
- This appliance is not intended for commercial use.
- Never drop or insert any object into an opening.
- Never block the air openings of the appliance or place on a soft surface such as a bed or couch, where the air openings may be blocked. Keep the air openings free of lint and other debris.
- Attachments may get hot during use. Allow them to cool before handling.
- Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- Keep the cord away from heated surfaces.
- Do not use an extension cord with this appliance.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- After use do not wrap the cord around the appliance as in time this may cause the cord to fracture. Coil cord loosely by the side of the appliance in storage.
- Always ensure that the voltage to be used corresponds to the voltage marked on the unit.
- For additional protection, the installation of a residual current device (RCD) with a rated operating current not exceeding 30mA is advisable in the electrical current circuit supplying the bathroom. Ask your installer for advice.

Palermo AC Professional Dryer

The VS Sassoon Palermo AC Professional Dryer is a true professional salon dryer, designed and made in Italy with a professional AC motor delivering 2100 watts for salon results. It features ceramic tourmaline technology for the ultimate shine and gloss and an internal ionic generator to leave hair silky and shiny with reduced frizz. This stylish professional dryer has power, precision and is ideal for drying and styling all hair types, giving you the confidence to achieve your own desired look.

for news, styling tips and much more.

Features:

1. 2100 watts
2. AC professional motor
3. Ionic Conditioning Technology
4. Ceramic Tourmaline Technology
5. 2 heat & 2 speed settings & cold air setting
6. Ultra slim concentrator nozzle
7. Removable rear filter
8. Hanging loop
9. Made in Italy

How to use your Palermo AC Professional Dryer

1. Remove all packaging and point of sale labels before use.
2. Wash and condition your hair as usual.
3. Always towel-dry your hair and ensure that the hair is combed through and detangled before using the dryer, then divide hair into equal sections.
4. Ensure the switch is set to the off '0' setting before plugging into a 230/240v power outlet.
5. Select the required heat and speed setting. There are 2 heat and 2 speed settings, plus the cold setting.
 - a. Use the low heat and speed setting as the hair begins to dry and for styling and scrunch drying. The low heat is also best for fine or damaged hair.
 - b. Use the high heat/low speed setting for normal hair.
 - c. Use the high heat and speed setting for initial drying. The highest setting is ideal for thick or hard to style hair.
6. Use the cold air setting on warm hair to rapidly cool the hair and set the style in place for a longer-lasting effect.

The Attachments:

Concentrator Nozzle

Use the slimline concentrator nozzle for directing airflow just where you want it, to ease styling and straightening.

Use the 6 x 75mm concentrator for precise styling on smaller sections. For additional control, use one of the lower settings and point the airflow along the surface of the hair to be dried.

CAUTION: Take care not to direct the airflow directly onto the skin (e.g. scalp, neck, ears, face, etc.) as hot air from hairdryers can, particularly if held too close, cause discomfort or even burns.

How does the ionic feature work?

Many aspects of modern living, including air conditioning, contact with man-made fibres and air pollution add to the build-up of static electricity in the hair. Even brushing and towel-drying the hair can increase these levels. This static charge causes the scales, or cuticles of the hair, to push hair strands apart, resulting in a rough hair surface. Consequently, hair may have a dull appearance.

High levels of static charge cause hair to become 'flyaway' and difficult to style. The advanced internal ionic generator conditions hair by emitting negative ions to reduce static, by leaving hair silky and shiny with reduced frizz.

What is Ceramic Tourmaline Technology?

Ceramic tourmaline technology delivers even heat without hot spots for a glossy, shiny finish. Tourmaline is a semiprecious crystal which is a natural source of negative ions and far-infrared (FIR) rays. The production of negative ions from tourmaline eliminates static in the hair, and far-infrared rays assist in the deep penetration of heat thus preventing hair damage.
