Temperature Setting Guide

Variable Temperature Control Settings	Hair Type
Medium setting - 180°C	Fine to average, treated hair
Medium high setting - 200°C	Normal, thick or wavy hair
Maximum setting - 230°C	Hard to straighten, very thick curly hair

Multi Voltage

This straightener has a multi voltage feature for worldwide use.

The voltage automatically converts for ease of use from 120/240V.

NOTE: This straightener has an internal automatic converter which will automatically convert the voltage without the need of a switch. A suitable plug adaptor will be required, please refer to the chart below.

Plug adaptor required	Voltage and plug adaptors	Country
	British plug: 230V	Ireland, Great Britain, Singapore, South America, Hong Kong (parts only), Africa (parts only)
	European plug: 230V	Asia, Europe, Middle East Noumea, Scandinavia, South America, Hong Kong (parts only)
	Australian & New Zealand plug: 240V	Australia, New Zealand
	American plug: 120V	North America, Japan, Canada (parts of)

How to use the heat protection mat/storage pouch?

The heat protection mat also doubles as an instant storage pouch.

To use the pouch as a heat protection mat, simply unclick and unfold the pouch until it opens completely. Place the straightener on the black heat protection surface and begin styling your hair.

After use, the straightener can be placed inside the pouch for storage. Ensure that the appliance is switched off and has cooled down before storing.

How does the ionic feature work?

Many aspects of modern living, including air conditioning, contact with man-made fibres and air pollution add to the build-up of static electricity in the hair. Even brushing and towel-drying the hair can increase these levels. This static charge causes the scales, or cuticles of the hair, to push hair strands apart, resulting in a rough hair surface. Consequently, hair may have a dull appearance. High levels of static charge cause hair to become 'flyaway' and difficult to style. The advanced internal ionic generator conditions hair by emitting negative ions to reduce static, by leaving hair silky and shiny with reduced frizz.

Buzzing noise

This product will make a faint buzzing noise, due to the Ionic conditioning technology™ function. This noises is completely normal, and part of standard operation of this product.

What is the CeramicTEC™ advanced ceramic heating technology?

This straightener features a microprocessor controlled professional ceramic heaters for perfect results by intelligently maintaining a high heat level. The internal ceramic heaters allow for ultra fast heat up and consistent heat delivery. This system provides consistent styling power so that every strand of hair is set with the same level of heat and comes out the same way, for a perfect, flawless finish.

User Maintenance

Your styler is designed for household use and is virtually maintenance free. No lubrication is needed. Keep all vents and openings clear of lint and other debris. If cleaning becomes necessary, disconnect the appliance from the power outlet. Allow the appliance to cool and wipe exterior with a cloth. If any abnormal conditions occur, allow to cool and return to your place of purchase.

Limited Three Year Warranty

To make a claim during the warranty period you must have proof of purchase receipt. We suggest that you attach you receipt to your instruction manual or warranty card for future reference. Conair Australia Pty Ltd. will repair or replace (at our option) your appliance free of charge for thirty-six months from the date of purchase if the appliance is defective in workmanship or materials. This warranty is an additional benefit and does not affect your legal rights. To obtain service under this warranty, please fill in and return the Warranty Registration as instructed.

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety instructions should always be followed, including the following:

Polythene bags over product or package may be dangerous. To avoid danger of suffocation, keep this wrapper away from babies and children. This bag is not a toy.

DANGER: When the unit is used in a bathroom, unplug it after use since the proximity of water presents a hazard even when the unit is switched off.

WARNING: Do not use this appliance in or near bathtubs, showers, basins or other vessels containing water.

- Do not immerse in water or other liquids.
- Do not reach for an appliance that has fallen into water. Unplug immediately.
- Take care to avoid contact between the hot surfaces of the unit and the skin, paying particular attention to the face, neck and hands.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure they do not play with the appliance.

IMPORTANT: Always unplug the appliance when not in use or before cleaning. Do not leave unattended when plugged in or switched on.

Do not place on any heat sensitive surface and always allow to cool before storing away.

- Do not use any attachments other than those supplied by Conair Australia Pty Ltd.
- Use this appliance only for its intended use and as described in this instruction booklet.
- This appliance is not intended for commercial use.
- Never drop or insert any object into an opening.
- Never block the air openings of the appliance or place on a soft surface such as a bed or couch, where the air openings may be blocked. Keep the air openings free of lint and other debris.
- Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- Keep the cord away from heated surfaces.
- Do not use an extension cord with this appliance.
- If the supply cord is damaged it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- After use do not wrap the cord around the appliance as in time this may cause the cord to fracture. Coil cord loosely by the side of the appliance in storage.
- Always ensure that the voltage to be used corresponds to the voltage marked on the unit.
- For additional protection, the installation of a residual current device (RCD) with a rated operating current not exceeding 30mA is advisable in the electrical current circuit supplying the bathroom. Ask your installer for advice.

Ultimate Salon Straightener

The VS Sassoon Ultimate Salon Straightener is a sleek slimline straightener that features 30% longer plates* for quicker styling and straightening. It features super shine titanium plates that glide through the hair for ultimate shine and smoothness. It features CeramicTEC™ advanced ceramic heating technology for ultra fast heat-up in 15 seconds and fast heat recovery, reaching a maximum heat of 230°C for seriously straight results. With an internal multi voltage system, perfect for travel, and floating plate for even pressure.

This professional straightener is the ultimate styling tool and allows for styling all hair types, giving you the confidence to achieve your own desired look.

How to use your Ultimate Salon Straightener

1. Remove all packaging and point of sale labels before use.
2. A plastic cover has been placed over the plug to protect it from damage during transportation. Remove the plastic cover from the plug before use.
3. Ensure hair is clean and completely dry before using the appliance.
4. Comb through hair to prevent knots and tangles and then divide hair into equal sections, sectioning clips can be used to hold hair in place.
5. Plug the appliance into a 120/240V power outlet.
6. Place the appliance on a heat protective (such as the heat protection mat), flat level surface
7. Press the on button 'I' to switch the appliance on. The red indicator light will begin to blink and the blue light will illuminate to indicate that the internal ionic generator is switched on. As you move through the temperature settings the blue light will always stay illuminated until the straightener is switched off.
8. Slide the temperature switch to select the desired straightening temperature, using the below symbols as a guide. The red indicator light will blink until the desired temperature is reached:
 - = 180°C
 - = 200°C
 - = 230°CRefer to 'Temperature Setting Guide' for more information.
9. Style sections of hair until completed.
10. To turn the appliance off, press the off 'o' button. Allow appliance to cool before storing.

NB: This appliance has a safety automatic shut-off system, which will automatically turn the appliance off if left switched on accidentally for 72 minutes. If this occurs, please wait for appliance to cool. Switch the appliance off and unplug the power cord.

WARNING: This is a high heat appliance. Care must be taken to avoid the hot surfaces of the appliance coming into direct contact with the skin, in particular the eyes, ears, face and neck.

IMPORTANT: Hair that has been heavily bleached or chemically treated should only use the low heat settings on this product. Please consult your hairdresser on using heated appliances if you have any concerns about the condition of your hair.

NB: The heat-up time will vary depending on which temperature setting you select. It is suggested to use the lower heat settings when using the appliance for the first time

WARNING: This appliance is suitable for average use on the setting of 200°C. The 230°C maximum high heat setting is not suitable for hair that has been chemically treated, bleached or damaged.

DO NOT USE THIS PRODUCT ON HEAT DAMAGED OR CHEMICALLY DAMAGED HAIR ON THE HIGHER HEAT SETTINGS.
